

XM Satellite Radio is the best thing that ever happened to mass communications in America. I can choose to listen to the left, listen to the right, or to whatever I desire, with clarity, nationwide. No standard broadcast media, whether amplitude or frequency modulation, can equal the digital satellite network. XM "Instant Traffic and Weather" is the Hallmark of up-to-date and accurate information. The National Association of Broadcasters, with vested interests other than the best interests of the listening public, should not dictate what I can hear. Please reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that I demand and deserve.
